

Our diesel driven pump set is design to work in the most harsh conditions. The air cooled 4 cylinder diesel engine is the most reliable and robust engine in the market. The Gorman Rupp self priming pump is designed for pumping dirty fluids and corrosive fluids. All equipment is built into a strong boxframe for easy transportation and protection.

FEATURES

- Frame designed and certified according DNV 2.7-1
- ISO Corner Blocks
- Deutz engine and Gorman Rupp pump
- Spring starter
- Stainless steel daytank

BENEFITS

- Globally accepted for offshore use
- Quick and safe fixation on truck or deck
- Most reliable engine and pump in the market, wide availability of spare parts
- Easy and reliable starting of engine
- Large diesel tank and corrosion free

APPLICATIONS

- Completion fluids
- Produced water
- Work over fluids
- Gravel pack fluids
- Waste water
- (Bio) diesel
- Surface water intake
- Process water
- Pre filtration RO
- Frac fluids
- Pipeline flushing
